DETAILED ACTION

Continued Examination Under 37 CFR 1.114

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on March 14, 2003, has been entered.

2. Applicant's amendment has canceled claims 1, 2, 5-8 and 18-29, all of the claims previously under consideration, and has presented new claims 30-49. These newly presented claims are directed to patentably distinct species as set forth below.

Election/Restrictions

3. Restriction to one of the following inventions is required under 35 U.S.C. 121:

4. This application contains claims directed to the following patentably distinct species of the claimed invention: 1) an electrolytic cell with a plurality of electrical contacts defining a processing plane, a plurality of concentric anode segments wherein an upper surface of each of the plurality of anode segments is in direct line of sight of the entire processing plane; 2) an electrolytic cell with a plurality of

electrical contacts defining a processing plane, a plurality of concentric anode segments, and insulating members between adjacent segments of the anode segments, wherein a vertical distance between the plurality of anode segments and the processing plane is less than a vertical distance between the insulating members and the process plane; 3) an electrolytic cell with a plurality of electrical contacts defining a processing plane, a plurality of concentric anode segments adapted to generate a substantially uniform electric field across the width of the cell, and insulating members between adjacent segments of the plurality of anode segments.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species for prosecution on the merits to which the claims shall be restricted if no generic claim is finally held to be allowable. Currently, none of the claims is generic.

Applicant is advised that a reply to this requirement must include an identification of the species that is elected consonant with this requirement, and a listing of all claims readable thereon, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered nonresponsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37

CFR 1.141. If claims are added after the election, applicant must indicate which are readable upon the elected species. MPEP § 809.02(a).

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

5. Any inquiry concerning this communication or earlier communications from the examiner should be directed to William T. Leader whose telephone number is 703-308-2530. The examiner can normally be reached on Mondays-Thursdays and alternate Fridays, 7:30-4:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Roy King, can be reached on 703-308-1146. The fax phone numbers for the organization where this application or proceeding is assigned are 703-872-9310 for regular communications and 703-872-9311 for After Final communications.
